cumstances. Facts of this conclusive nature speak more in favour of a medicine than columns of pompeus eulogy founded on mere assertion.
It is not indeed presumptuously pro-

posed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for beheving that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions-to restore and amend the appetite-to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its brst appearance : they are celebrated for removing habitual costiveness-sickness at the stomach and severe head-ache-and aught to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Hamilton's Elixir,

ALEXANDRIA GAZETTE AND DAILY SUVERTISER.

PUBLISHED BY SAMUEL SNOWDEN, MOYAL-STREET.

Drily Gazette 87 ... Country Gazette 85. FRIDAY, NOVEMBER 28, 1817.

From the N. Y. Daily Adver. Nov. 24.

The session of congress, which commences on Monday next, is looked for, at least by the publishers of newspapers, with considerable solicitude, with the hope that it may furnish them with materials for their gazettes, of a character rather more interesting than the late dearth has placed within their reach.

It seems to be imagined, by many persons, that, in this state of profound and general peace, the coming session of the national legislature will not produce much that is likely to engage the attention or excite the feelings of the community. What it may produce we pretend not to foresee. But it is scarcely possible that the attention and the teelings of the people of this country should ever be so indifferent to their highest concerns as to disregard the proceedings of their general legislature. This nation is still in its youth, it is extending its habitable limits, and multiplying its population in a wooderful and unexampled manner.-It commenced its national career under different circumstances from any other that ever existed, and .upon principles, in a great measure, novel and untried by any preceding community. Although the laws and habits of many of the oldest states may be considered as fixed and adjusted, yet a very large portion of the country is new and unsettled-new states are constantly forming, new constitutions of government, of course, are traming and going into operation over communities, whose existence, as such, is but of yesterday, and whose laws and institutions are necessarily to be enacted and applied to the general circumstances and sentiments of those over whom they are to operate, and whose conduct is by them to be regulated and controlled: Each new state assumes its share of duties to the nation immediately upon receiving from the nation its political being, and. of course, the laws and general affairs of the nation must have an intimate relationship with the laws and concerns of the several states. In this point of view. the business of congress will always command the attention and excite the deep interests of the country at large.

It is altogether a mistake to conclude, that when there is no war or national controversy on hand, there is nothing to engage our attention to our mational conerns. We are vastly more interested in peace than we can be in war. Peace is a blessing of the highest national importance, and on it depends, under Providence, our prosperity and happiness .-War is a national judgment, and never visits a people without bringing in its train the greatest evils disease, death, desolation, and misery. If we regard our own highest interest, we shall, as far Communicated for the American Daily as a just and independent people, avoid war; and in the same degree shall we cultivate peace. Peace is more important to the United States than to any other nation. We can never be conquered by any foreign power. The few nations whose numbers or military character might lead them, in other circumstances, to wish for such an achievement, are so far removed from us that they can never hope to accomplish it. We have nothing in any pertion of our neighborhood which can ever give us even a momentary uneasiness on this subject.

South America is held up to the public view as an object likely to engage the attention of congress. Probably it may But it cannot but be borne in mind that South America is not North America. and that the Spanish provinces are not the United States. The people of this country, attached as they may be to freedom, and opposed as they are in their feelings to tyranny and oppression, will never patiently see their own great interest of a foreign country, or for the purpose of benefitting those with whom we have no other than the interest of a possible commerce, or the enthusiasm of knight ble commerce, or the enthusiasm of knight errantry. SUBRECTION AT SAPORANAS. A Calcut's paper, brought by the shir Trident, Captain Rae, arrived at this port on Saturday evening, contains in-telligence under the head of Madras, July 19, of a very serious insurrection hav ing broke out on the 13th May last at oranas, one of the principal residencies attached to Amboyna, in which the resident and his family had fallen victims to the treachery of the natives. lorce of 200 men had been sent by the Dutch authorities the day after the insurrection to quell the disturbance, but the whole party had been destroyed immedi-

ately on their landing.
A letter from Saporanas, dated the 17th of June, gives the whole particulars relating to the above affair. It was re-ceived by the commissioners of his majesty the king of the Neiherlands at Am-boyna, from Mrs. Vandenburg, the wife of the resident. She states, that her huaband had been seized at the Negree of sequence, she had taken refuge in The party who were sent to quell the insurgents, consisted of 150 European sailors and soldiers, with about 50 natives. The attack was made in boats The Europeans were overpowered, and nearly all destroyed—among them seve-

MEXICO. We have letters from Orleans of the 13th October, at which time the calamity which had prevailed so long there had subsided, and business of every kind was about to resume its former activity,

Accounts received at Orleans from Ve ra Cruz and the Havana, concor in stat-ing that General Mina had arrived, with a powerful force, within six leagues of city of Mexico; and a good under standing was expected to take place be-tween the adverse parties, and that both would onite in maintaining Mexico as an independent nation.

New York, Nov. 24. The sohr General Jackson, which ar rived this morning in 35 days from Aux-Caves, was boarded in lat. 28 50, long 30 26, by the Mexican privateer Superi-Capt. Jolly, who informed that he captured on the 1st inst. the Spanish scho Tentertia, bound from the coast of Af i ca to Havana, with 290 slaves. On the 2d instant, the same privateer captured the schr City of Tortola, from Havans hound to Laguira, with a cargo consisting of a quantity of rum and abthousand pounds of gunpowder, which had been shipped for the use of the royal army under Gen. Morilla. Both prize manned, and ordered to Amelia were n

Gentlemen-The reading part of the community already knows that Dr. Joel Abbott, of Georgia, has for several years Abbott, of Georgia, has for several years distinguished himself by enquiries into Magnetism. As long ago as 1802, there was a summary of his opinions published in Mitchill & Miller's Medical Reposiory at New York. A. SPECTRE. On Thursday night, about 19 o'clock, was ap in my room; as I was a little unwell, al lamp was kept burning, which, for the want of trimming, had become dim; my thoughts had for some time been ever ed on the eares and anxieties of this life. and the short time we had to enjoy its pleasures, even should our atmost desires be gratified as merely to look about us and die." In the midst of these reflections, theard the thrilling howl of the

So strange and sudden an appearance filled me with the utmost stread and confusion—the Ighast continued to look with silence and scrutiny upon meevery moment became more frightful and ghastly. I first endeavored to call a ser vant, but was unable to utier a word. At length I became more composed, and asked, in a faultering tone, who is that? Not a word was answered. This more alarmed me. Again I asked, who is that ? Are you a man, or is it a ghost that I look on? and what do you want? The apparition then answered, with a faint and pathetic tone, " I come not to harm you, but to warn you of a danger not far distant that will befal thousands of your tellow men; watch then and be aware. for you are to be amongst the principal actors to ever the calamity." At these words my blood ran cold, my limbs were agitated, my eyes grew dim, and the spectre vanished. When I had comored myself, I-trimmed my lamp, looked about the room, walked to the door and shut it, then looked at my watch, and found it to be half after twelve. I then endeavored to persuade myself it was a dream. It was certainly not a dream; nor was it the chimerical phantom of a diseased mind, but a sober and candid description of what il saw, as above re-A SUBSCRIBER,

Our author in his next section details with much elegance and perspicuity the progress of the revolution in its early sta-This account is connected so closey with the life of Henry, and seems to arise so paturally out of it, that the work would be incomplete without it. Biographers frequently use the incidents of a man's life for no other purpose than to introduce their own speculations, under his name. Their digressions are so pumerous and so little connected with their subject, that the reader often loses sight of the main personage in attending to the author's episodes. Several notable examples might be mentioned where one may read half a volume of biography, before the unfortunate man whose LIFE it purports to be, can be said, (like Tris-Shandy) to be fairly born. From the alenderest materials, the author con trives with the assistance of this wire drawing system, to eke out a ponderous volume ; taking care all the while to keep, as in an injudicious painting, his princi-pal figure in the back ground, and to bring forward every subordinate one with ostentations parade. Thus you are just able dimly to discover the portrait you are seeking, in the midst of fifty other objects placed so prominently on the eauintended to obscure and hide it. Not so ofth our author-His digressions are always easy, natural and unaffected; tending to illustrate his subject, and not to darken or confuse it ; keeping steadily in view the development of Mr. Henry's private and public character, and displaying it, in various attitudes. as it happened to be influenced and affected the circumstances in which he was laced. These circumstances, in order to give due effect to the picture, he is of ourse obliged to explain; and as Mr. Henry acted a most conspicuous part in our revolutionary struggle, he is led by the easiest gradation to speak of its most

In this posture of things, the convention met in the city of Richmond on the 24th July, 1775. One of their first measures was to raise and embody two regiments of regulars and to appoint officers to command their.

The lolty stand which Mr. Henry had taken in the American eause, his in creasing popularity and the prompt and energetic movement which he had made in the affair of the gunpowder, brought him strongly before the view of the house; and he was elected the colonel of the first regiment, and the commander of all the forces raised, and to be raised for the defence of the colony. Mr. Wm. Woodford, who is said to have distinguished sself in the French and Indian war, was appointed to the command of the seelment."

The former soon entered actively and zealously upon the duties of his new of-fice—but in the course of a very lew months, threw it up in disgust at the slights and mortifications he met with, (it would seem without any sufficient reason) from various quarters. Whilst he held the command he had no opportunity to distinguish himself; for col. Woodlers to distinguish himself; for col. Woodlers had been sent by the committee of safety

Immediately upon his resignation he was again elected a delegate to the convention from the county of hanover. By lar and settled form; blood had been profusely shed in various parts of the continent, and reconciliation had become hopeless." "The social compact which had united the monarch with his subjects was at an end," the colonial constitution dissolved, and "all the rights and powers of government reverted of necessity, to their source, the people." The conven-tion which was elected expressly to take care of the republic, met in Williamsburg on the 6th May, 1776. On the 15th of the same month, " Mr. Carey reported from the committee of the whole on the state of the colony, the following preamble and resolutions, which were nanimously adopted : " Forasuruch as all the endeavors of

the united colonies, by the most decent representations and petitions to the king and parliament of Great Britain, to resto e peace and security to America under the British government, and a reunion with the people upon just and li-beral terms, instead of a reuress of grievances, have produced, from an imperious and vindictive administration, increased insulf, oppression, and a vigorous attempt to effect our total destruction. By a late act, all these colonies are declared to be in rebellion, and out of the protection of the British crown ; our properties subjected to confiscation; our people, when captivated, compelled to join in the murder and plundered of their relations and countrymen; and all former rapine and oppression of Americans declared legal i just. Pleets and armies are rias and the aid of foreign troops engaged to assist these destructive purposes. The king's representative in this colony bath not only withheld all the powers of go-verment, from operating for our safety, but, having retired on board an armed ship, is carrying on a piratical and savage war against us, tempting our slaves, by every a lifice, to resort to him, and training and employing them against their masters. In this state of extreme danger, we have no alternanative left, but an ab ject submission to the will of those overbearing tyrants, or a total separation from the crown and government of Great Britain : uniting and exerting the strength of all America for defence, and forming alliances with foreign powers for com-merce and aid in war. Wherefore, ap-pealing to the Searcher of hearts for the sincerity of former declarations, expressing our desire to preserve the connexion with that nation, and that we are driven from that inclination by their wicked councils, and the eternal laws of selfpreservation.

" Resolved manimously, That the delegales appointed to represent this colony in general congress, be instructed to propose to that respectable body, to declars the united co.onies free and inde-pendent states, absolved from all allegiance to, or dependence upon, the crown or parliament of Great Britain; and that they give the assent of this colony to such declaration, and to whate weasures may be thought proper sary by the congress for few alliances, and a confederation as to them shall s that the power of forming government for, and the regulations of, the internal concerns of each colony, be left to the respective colonial legislatures.

Resolved, manimously, That a committee be appointed to prepare a declara-tion of rights, and such a plan of govern. ment as will be most likely to maintain peace and order in this colony, and secure substantial and equal liberty to the

The declaration of rights was written by Mr. Jefferson, and forwarded from Philadelphia to his friend Mr. Wythe. Sully for Sale. THIS estate, situated in the county of Pairfax, twenty two miles from Alexandria, and the same distance from Georgetown, contains about seven hundred and fifty acres. Little River Turn-pike passes through it half a mile from the dwelling house. The situation is handsome, and remarkably healthy; the water is good and abundant. The soil water is good and abundant. The soil which was originally excellent, has for some years past had the advantage of improving husbandry, Plaister of Paris acting with powerful and immediate effect on all grasses and grains. The fields present a good surface for cultivation; and those, now untilled, are covered with and claver. The organity are very large and those, now untilled, are covered with red claver. The orchards are very large and thrifty; the collection of table fruit is choice and various. The mansion is spacious and well constructed: the outhouses are conveniently situated, and the whole have been lately thoroughly repaired and painted. The larm houses, which are all nearly new, are expensive and excellent in their kind.

For a gentlaman of lessure this would be a delightful residence; and a prafitable estate for an active farmer. The fitte is indisputable, and perfectly unintumbered.

Hamilton's Worm-destroying Lozen

Which have within sixteen years p

cured an immense number of persons of both sexes of every age and in every si-tuation, of various difference complaints arising from WORMS, and from obstructions or foulness in the stemach and bow-

This medicine bears no analogy what ever to others of similar titles so com monly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being saited to every age and constitution. It contains nothing but what is perfectly ir-nocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but should no worms exist in the body, car-sill without pain or griping cleanse the stemach and bowels of whatever is foul or offensive, and thereby prevent the pre-duction of worms and many fatal dis. orders. The lezenges are particularly efficacions in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mild est purgative that can be used on any

Description of Worms, and the symp tome by which they are known.

Worms which infeat the human body are chiefly of four kinds viz.—The Te res or large round worm; the Ascari-des or small may-worm; the Cucurbi-ting or short flat white worm; and astly, the Trenia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms.

are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grind ing of the teeth in sleep; irregular apper tite, sometimes leathing food and some times veracious; proving with sliny and times veracious; parging with shiny and feetid stools; vomiting; large and hard belly; pains and sickness at the sto-mach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate re course to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.
